EDUCATION

Bachelor of Technology, Computer Science Engineering

Manav Rachna International Institute of Research And Studies
Aug 2023 - Aug 2027 | Haryana, India

Higher Secondary School - 12th CBSE

Ashok Memorial Public School
July 2022 | Haryana, India

SKILLS

Programming Languages

C/C++

JavaScript

HTML/CSS

Python

Frameworks

React

Node.js

Tailwind

Bootstrap

Material-UI

Backend Development

Node.js

MongoDB

Developer Tools

Git

VS Code

Visual Studio

PyCharm

Eclipse

Libraries

pandas

NumPy

Matplotlib

Computer Science Fundamentals

Data Structures

Algorithms

CERTIFICATIONS

- Harvard's CS50: Introduction to Computer Science
- Career Essentials in Software Development by Microsoft and LinkedIn
- Harvard's CS50: Introduction to Programming with Python

EXPERIENCE

Web Designer Intern

Dr OP Bhalla Foundation

Sep 2024 - Nov 2024 | Faridabad, HR

- Spearheaded a comprehensive website redesign, improving user experience and functionality.
- Optimized website performance using SEO best practices, resulting in a 24% increase in web traffic.
- Customized WordPress themes and plugins to align with branding and requirements.
- Developed and implemented a media optimization strategy, reducing page load time.

PROJECTS

Self Driving Car

JavaScript, HTML, CSS

[Live](#) | [GitHub](#)

- Designed and developed a self-driving car using JavaScript and HTML Canvas, demonstrating navigation logic.
- Built a neural network from scratch without external libraries to showcase problem-solving skills.
- Implemented real-time obstacle detection and collision avoidance for autonomous movement.

Infinite Crypto

React, JavaScript, API, Google Charts

[Live](#) | [GitHub](#)

- Built a real-time crypto dashboard using React, Vite, and charting components for data visualization.
- Integrated public APIs to fetch live market data and display trends seamlessly.
- Created a responsive interface with clean state handling and fast updates.

Nerd Nexus

React, Firebase, Tailwind CSS

[Live](#) | [GitHub](#)

- Developed a blog platform with authentication, database support, and content publishing workflows.
- Implemented post creation, commenting, and user interactions with a smooth full-stack experience.
- Styled the interface with a minimal reading-focused layout and responsive components.

TaskSphere

Node.js, Express, MongoDB, EJS

[Live](#) | [GitHub](#)

- Created a task management app with CRUD operations, authentication, and persistent storage.
- Organized projects, deadlines, and priority workflows into a simple productivity dashboard.
- Focused on clean server-side structure and maintainable database schema design.
